

# VISION STATUS

**UDAY DEVGAN MD, FACS, FRCS**

Because of your vision, how much difficulty do you have with the following activities? Check the box that best describes your difficulty level, even with glasses. If you do not perform the activity for reasons unrelated to your vision, check N/A.

	N/A	A LITTLE DIFFICULTY	MODERATE DIFFICULTY	A GREAT DEAL OF DIFFICULTY	UNABLE TO DO THIS
Reading small print, such as medicine bottle labels, a telephone book, or food labels					
Reading a newspaper or a book					
Reading a large-print book or large-print newspaper or numbers on a telephone					
Recognizing people when they are close to you					
Seeing steps, stairs or curbs					
Reading traffic signs, street signs or store signs					
Doing fine handwork like sewing, knitting, crocheting, carpentry					
Writing checks or filling out forms					
Taking part in sports like bowling, tennis, golf					
Cooking					
Watching television					
Driving during the day					
Driving at night					

Cataract surgery can almost always be safely postponed until you feel that you need better vision. If stronger glasses won't improve your vision any more, and the only way to help you see better is cataract surgery, do you feel your vision problem is bad enough to consider cataract surgery now?

**Yes, I feel that my vision is bad enough that I need to consider cataract surgery now.**

**No, my vision is not that bad and I am not ready to consider cataract surgery yet.**

## VISION PREFERENCES

**UDAY DEVGAN MD, FACS, FRCS**

We want to help you maintain excellent vision. One area of evaluation will be cataracts. The term "cataract" refers to a cloudy lens within the eye. When a cataract is removed, a lens implant is used to replace the cloudy human lens. If it is determined that a lens implant is appropriate for you, these answers will help us select an implant that best suits the vision demands of your lifestyle.

How would you feel about needing glasses after cataract surgery for distance tasks: driving, golf, tennis, other sports, watching TV.  Prefer no distance glasses  
 I wouldn't mind wearing distance glasses

---

How would you feel about needing glasses after cataract surgery for mid-range tasks: seeing computer, menus, price tags, cooking, board games.  Prefer no mid-range glasses  
 I wouldn't mind wearing mid-range glasses

---

How would you feel about needing glasses after cataract surgery for near vision tasks: reading books, newspapers, magazines, doing detailed handwork?  Prefer no near glasses  
 I wouldn't mind wearing near glasses

---

Please check the single statement that best describes you in terms of night vision:  Night vision is extremely important to me, and I require the best possible quality.  
 I want to be able to drive comfortably at night, but I would tolerate some slight imperfections.  
 Night vision is not important to me.

---

If you had to wear glasses after surgery for one activity, for which activity would you be most willing to use glasses?  Distance Vision  
 Mid-range Vision  
 Near Vision

---

If you could have good distance vision during the day without glasses, and good near vision for reading without glasses, but the compromise was that you might see some halos around lights at night, would that be OK?  Yes  
 No

---

If you could have good distance vision and mid-range without glasses, but the compromise was that you might need glasses for reading the finest print at near, would you like that option?  Yes  
 No

---

How many hours per day do you spend: \_\_\_\_\_ On the computer  
\_\_\_\_\_ Reading books, newspapers, or small print  
\_\_\_\_\_ Driving

---

List your favorite hobbies or work activities.

---

Please place an "X" on the scale to describe your personality as best you can:
