

UDAY DEVGAN MD, FACS, FRCS

DISCLOSURE OF RELATIONSHIPS WITH PHARMACEUTICAL AND MEDICAL DEVICE MANUFACTURERS

Dr. Devgan is honored to be one of the very few consultants and key opinion leaders in the ophthalmology world. He has invented surgical instruments, developed new lens implants, received patents for innovations, and works with medical companies to shape the future of eye surgery. There are 18,000 ophthalmologists in the USA, but less than 1% of them are chosen to be key opinion leaders, researchers, speakers, and consultants. This is a potential advantage for you in two ways: Dr. Devgan is involved with, and has access to, the latest products and innovations, and it gives you reassurance since these multi-billion dollar medical companies choose only the best-of-the-best physicians.

For his work, Dr. Devgan is paid by pharmaceutical, medical device, and consulting companies to assist in development, research, and educational programs for their products. The pharmaceutical and medical device products that Dr. Devgan chooses for surgery are tailored to be optimal for each specific patient and may be from some of the companies listed below. Direct payment is never made to Dr. Devgan in exchange for usage of specific products. Your best interest always comes first.

The Open Payments database is a federal tool used to search payments made by drug and device companies to physicians and teaching hospitals. The federal Physician Payments Sunshine Act requires that detailed information about payment and other payments of value worth over ten dollars (\$10) from manufacturers of drugs, medical devices, and biologics to physicians and teaching hospitals be made available to the public. For informational purposes only, a link to the federal Centers for Medicare and Medicaid Services (CMS) Open Payments web page is provided here: <https://openpaymentsdata.cms.gov>
